SDC Hackathon 2026

Replit — Proof of Usage (POU)

Team Name: HTL

Project Name: Quora Chat

Selected Domain: Domain 2 — ALPHA RED

Platform: Replit

Replit Project URL: https://replit.com/@RyanLau7/quora-chat

Live Deployment URL: https://quora-chat.replit.app/

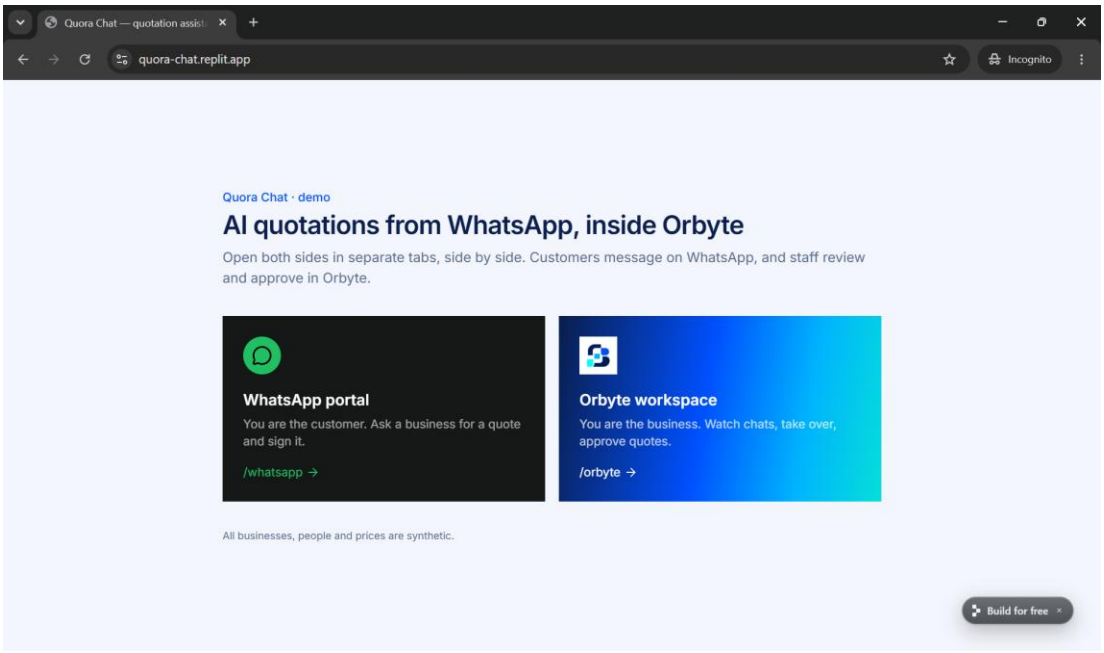

GitHub Repository: https://github.com/jasonwong1025/quora-chat

1. Purpose of Replit Usage

- **Application Hosting:** The deployed web application and background workflow worker operate through the Replit hosting environment.
- **Database Services:** Replit-managed PostgreSQL stores synthetic customer conversations, extracted requirements, quotation records, approvals, operational jobs and related activity history.
- **AI Integrations:** Replit AI Integrations provides managed access to OpenAI models for multilingual customer communication, requirement extraction, summarization and message drafting.
- **AI-Assisted Development:** Replit Agent was used to support project implementation, configuration, debugging and deployment-related development tasks.

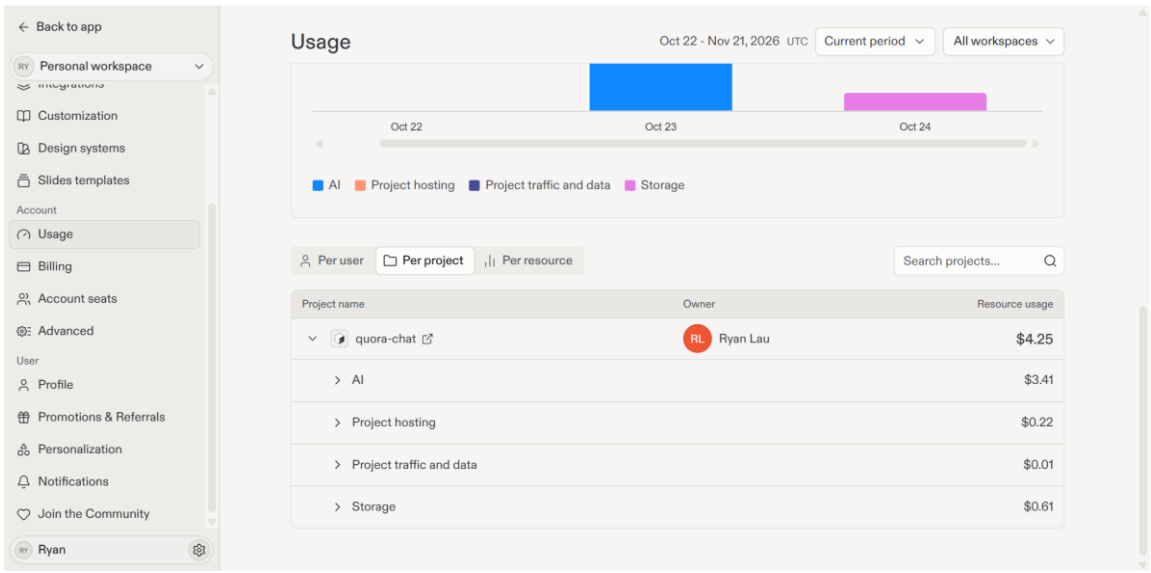

2. Live Deployment Evidence

Deployment URL: https://quora-chat.replit.app/

3. Replit Usage Evidence

The Replit Usage dashboard records activity under AI Agent and Replit AI Integrations for the billing period beginning 22 October 2026.

4. Declaration

We confirm that Replit was used in the development and deployment of Quora Chat for SDC Hackathon 2026. The attached screenshots and deployment URL are provided as evidence of platform usage.
